

**Your specialist for
Rail drives**
of all suppliers!

General inspection

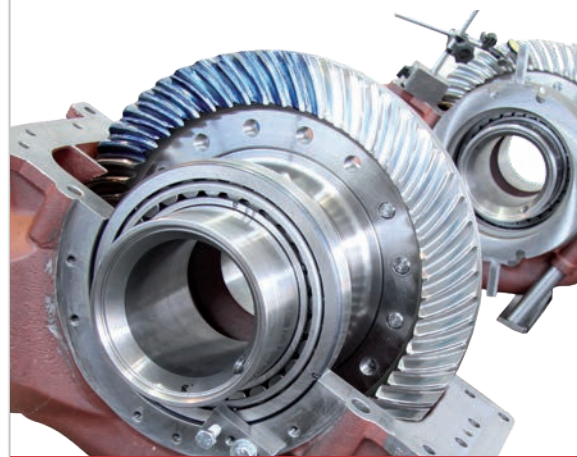

- AS Drives & Services GmbH is general contractor
- Inspection of axle drives
- Repair of gearboxes and motors
- Inspection on site

The advantages:

- Only one main responsible
- Reduces logistical effort
- Consideration of all components
=> Identification of interactions in the system

Gearbox- and motor-repair

- Type-independent repair of gearboxes and motors
- Extensive damage analysis
- Recalculation and redesign of drives
- Modification, if necessary
- Professional assembly
- Many years of experience in damage analysis as well as in the repair of gearboxes
- Certified quality according to DIN EN ISO 9001
- Flexible and reliable

Spare parts procurement

- Procurement and supply of spare parts of all kinds for rail drives: Gears, hollow shafts, bearings, bushings, couplings, flanges, labyrinths, housings, etc.
- Special and standard parts
- Design, construction and manufacturing of new spare parts
- Stock keeping
- Training of professional assembly and adjustment

Problem solver for special cases

- Damage analysis of problem cases
- Consideration of all components
=> Identification of interactions in the system
- Many years of experience in damage analysis as well as in the repair of gearboxes
- Design of new solutions
- Modification of existing components to eliminate constructive errors

ReDesign

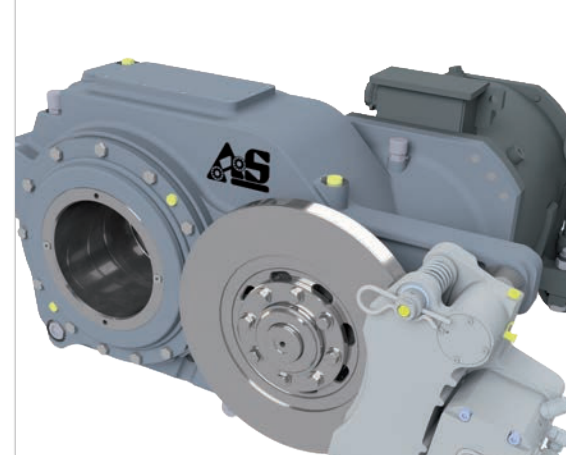

- Type-independent new design or construction of rail drives
- Performance calculation and redesign
- Manufacturing of all parts (incl. documentation)

Reasons for a ReDesign:

- Original manufacturer is no longer on the market
- Gearbox type is no longer built
- Increase of the circulation reserve by single and small series production
- Modification and improvement

Special drives

- Engineering of new drives
- Design
- Calculation of all components (Housing, gears, bearings etc.)
- Manufacturing of all components and final assembly
- Prototype construction
- Test bench runs
- Documentation
